

HOW TO RUN AWAY FROM RENT BILLS WITHOUT LANDLORDS/LANDLADYS NOTICE.

April 7, 2017

0.1 Introduction.

The fact is, rent is the most scaring term in the history of the householders, and it sounds as breaking news when landladies/ landlords knocks on the doors of the householders. However, the terms of paying rent fees varies, that is one may pay physically (face to face), through a bank or using pay-ways. Well here is the steps you can take to run away from rent bills that are increasing month per month. And all you need is aggressiveness, desire, time and creativity.

0.2 Methodology.

Start surveying for a new house(rental) that is relatively cheaper than the current rental. Make sure it is not within the same village as the one you are currently staying in. Consider that there is nothing that shall force you to pass through the same village again, not even your face to be seen anywhere in that village. Remember your departure should private, it must not be known by your fellow householders because they might betray you.

0.3 Procedures.

Organize all your house holds, gadgets, things, equipment in simple and transferable packages. Start taking one package or two at time to your new rental at night. Bulky house equipment/gadgets must be shifted last, and if one asks you with curiosity what you are doing, the answer is you are getting read of old things or you are taking them for repair in case of a fridge or television/radio. Make sure, by the end of the month you shall have shifted all of them.

0.4 Result.

After taking all your house equipment, you can now close the door or leave it open depending on your etiquette and give the keys to your neighbor. Leave without telling anyone, get time to rest, no one shall tamper with you except

the police. There you have escaped rent fee of that month and the previous months whose rent fees were overdue.

0.5 Conclusion.

Paying for rent is a very big task you have to do without any hesitation, and landladies/landlords start whispering about the due date even in the middle of the month. This boosts pressure on the side of the householder. So, above I have listed some steps a householder can take if the BILLS are on his/her neck.
